

## **Black Magic — the NEW Mini-Flesher Merlin Disc**

King Arthur's Tools introduces the NEW "Merlin Taxidermy Tool Set" featuring the new **Black Magic** mini-fleshing disc. The stainless steel disc is precision cut for a razor sharp edge, subjected to a three step heat treated hardening process for edge longevity. The two-inch diameter fleshing disc can be used to flesh on all types of skins and hides. It's phenomenal when used on alligator. The tougher the hide, the easier it works. For deer, use the **Black Magic** in conjunction with your large fleshing wheel to do the detail fleshing work around eyes, ears and mouth area. You can quickly and efficiently remove material in controlled slivers. You can easily keep your **Black Magic** razor sharp using a special hand file.

Weighing in at 1.5 pounds and 11" long, the Merlin Taxidermy Tool Set consists of a lightweight and easy to maneuver miniature long neck angle grinder that powers the **Black Magic** flesher and five additional 2" diameter accessories used for fleshing, trimming, cutting, sanding, grinding, sculpting and shaping all different types of material such as hides, skins, foam forms, fiberglass, wood, plastic, bone and metal.

The variable speed Merlin operates between 6,500 to 13,000 rpm, allowing the taxidermist to dial in the speed and aggressiveness required for each task.
